LEGAL NOTICE
Five-Year Review
Former Naval Air Station
South Weymouth
Weymouth, Massachusetts

The Department of the Navy, in cooperation with the U.S. Environmental Protection Agency (EPA) and the Massachusetts Department of Environmental Protection (MassDEP), has begun a five-year review of the remedies implemented at the former Naval Air Station South Weymouth, Weymouth, Massachusetts. The purpose of the five-year review is to ensure that the selected remedies are effectively protecting public health and the environment. The five-year review process is mandated under the Comprehensive Environmental Response, Compensation and Liability Act (CERCLA) (also known as Superfund) for sites where the selected remedial action results in contaminants remaining above levels that allow for unlimited use and unrestricted exposure. The Navy's *Policy for Conducting Five-Year Reviews under the CERCLA Program and EPA's Comprehensive Five-Year Review Guidance* will be used in the preparation of this review. This first five-year review for NAS South Weymouth will focus on the Rubble Disposal Area, where a remedial action has been implemented.

The Navy will conduct interviews, review reports, and assess site conditions to evaluate if the remedies remain protective of human health and the environment. Public participation is encouraged and welcomed. If you are interested in participating in the interview process, please contact Brian Helland at **(215) 897-4912** or the address noted below.
