Jeffrey Harlow shows RAB members and LANTDIV employees an IR site on the map.

NAVAL WEAPONS STATION YORKTOWN — Jeffrey Harlow, Installation Restoration (IR) program manager, recently provided a tour of the Naval Weapons Station Yorktown IR sites for members of the Restoration Advisory Board (RAB.) The RAB consists of representatives from the community who are interested in the IR program cleanup process. The RAB provides a forum through which members of the local community, the Station and regulatory agencies can work together.
