List all constituents on both pages of this document that are present in D001(except for TOC≥ 10%), D002, D003# and D004-D043 waste streams in concentrations above the stated levels. The regulatory levels are in total concentrations, unless noted with an asterick. (# Explosive, water reactive and other reactive only) (WW = Wastewater; NWW = Non-Wastewater). Insert the manifest line identifier (MLI) in the boxed to the left of the constituents. If using this form in association with a profile, place an X in the box next to the appropriate constituent(#).

List all constituents on both pages of this document that are present in D001(except for TOC≥ 10%), D002, D003# and D004-D043 waste streams in concentrations above the stated levels. The regulatory levels are in total concentrations, unless noted with an asterick. (# Explosive, water reactive and other reactive only) (WW = Wastewater; NWW = Non-Wastewater). Insert the manifest line identifier (MLI) in the boxed to the left of the constituents. If using this form in association with a profile, place an X in the box next to the appropriate constituent(s).

Please provide the benzene concentration in the waste shipment, if known: _____ ppm.

E. HERBICIDE/PESTICIDE/PCB CERTIFICATION

I certify under the penalty of law that I am the original generator of the waste described on the manifest listed above and am familiar with the process by which the waste was generated and can certify that no herbicides, pesticides, or PCB's above regulatory limits are contained in the waste listed on the manifest.

If any herbicides, pesticides, or PCB's are present above regulatory limits in our waste when processed, we will be liable to bear all cost for disposal of any waste contaminated with these materials and the decontamination of all processing equipment contaminated with those materials.

I understand that there are significant penalties for submitting a false certification.

F. CERTIFICATION

I certify under penalty of law that I have examined and am familiar with the waste through analysis and testing or through knowledge of the waste to support this certification.
