

## ERB Acronym and Glossary – J

Acronym	Glossary	Definition
J	data qualifiers - organic analysis - J	Positive identification, but estimated concentration. This flag is used either when estimating a concentration for TIC where a 1:1 response is assumed, or when the mass spectral data indicate the presence of a compound that meets the identification criteria but the result is less than the sample quantitation limit but greater than zero.
JAG	Judge Advocate General	the JAG is the senior legal officer of the Army, Navy, or Air Force.
JP-4	Jet Fuel 4	Substances that are used by the U.S. Air Force as aircraft fuels. JP-4 is a colorless to straw-colored liquid. It smells like gasoline and/or kerosene and is flammable. JP-4 can be made by refining either crude petroleum oil or shale oil. Both JP-4 are blends of other chemicals made according to standards specified by the U.S. Air Force for each fuel.
JP-5	Jet Fuel 5	are substances that are used by the U.S. Air Force as aircraft fuels.
JSA	Job Safety Analysis	A method to review job procedures or practices to identify hazards and subsequently determine appropriate equipment and controls for implementation during performance of the job or task.

## ERB Glossary – J

Acronym	Glossary	Definition
	jetting	Involves the injection of grout or slurry at high pressures into the ground. The high velocity erodes the soil and replaces some or all of it with grout or slurry. The delivery mechanism used for PRB installation is a triple-rod injection system, which delivers a fine-grained iron/guar gum slurry mixture, air, and water into the subsurface.
