Subject: SIA Ecological Survey Approach

Rich,
As discussed on the phone call 28 September 2009 the ecological evaluation of the formerly agreed to areas that may have T&E species present will begin the week of 2 November 2009. Attached is the approach for conducting the evaluation which follows the previously approved approach utilized in the ECA. Please distribute to FWS personnel as needed. Also, if FWS would like to observe the evaluation it is estimated to be finished approximately 30 November, so please let the Navy know of your request and we can assist to coordinate the request and support.

Thanks
Stacin
