Boston, MA 02109-3912

Ms. Claudia Sait
Remedial Project Manager
Maine Department of Environmental Protection
Bureau of Remediation and Waste Management
State House, Station 17
Augusta, ME 04333-0017

Dear Mr. Daly and Ms. Sait:

Enclosed, please find the "*Draft Interim After Action Report for Munitions and Explosives of Concern (MEC) Time Critical Removal Action at the Field Munitions Bunker West Area (FMBW)*", Naval Air Station Brunswick, Maine. This report is provided for your consideration.

No residual explosive materials of any kind were found at the FMBW Area, and as a result, the Navy does not intend to conduct further investigations for MEC. Based on the field survey described in this report, the current site conceptual model suggests that there are minimal impacts to the area from past training operations. The Navy does, however, propose conducting a focused surface soil investigation for lead in the areas of buildings 63 and 64 which were used as munitions storage bunkers. Recent RCRA Investigations detected elevated levels of lead within these buildings, and the Navy would like to verify that there are no significant levels of lead remaining in the soil outside these buildings from past operations.

If you have any questions or comments, please contact the Navy's Remedial Project Manager, Todd Bober at (215) 897-4911.

Sincerely,

A handwritten signature in black ink, appearing to read "Paul F. Burgio".

Paul F. Burgio
BRAC Environmental Coordinator
By direction of BRAC PMO
