Subject: AOC55C ERA

EPA reviewed the Final Ecological Risk Assessment for Area of Concern 55C, Debris Area North of Trotter Road, Naval Air Station South Weymouth, Weymouth, Massachusetts, dated October 2009 for incorporation of EPA comments on the October 2007 Draft ERA and subsequent comments/responses. Two minor comments are outstanding. EPA does not plan to write a formal letter on this.

Attachment A Comments

SC 1 While the bullets in Section 4.3.2.2 have been revised to clarify which receptors are exposed to surface soil and which are exposed to sediment, the Measurement Endpoints in Section 4.3.2.1 still only refer to surface soil exposures. They should refer to sediment also.

Appendix I - Wetland Functional Assessment

Specific Comment 1 The red star that is supposed to depict the approximate location of AOC 55C in Figure 1 does not show up in the electronic copy of the report. Please add the star to the figure.
