Boston, MA 02109-3912

Mr. David Chaffin
Bureau of Waste Site Cleanup
Massachusetts Department of Environmental Protection
One Winter Street
Boston, MA 02108

Dear Ms. Keating and Mr. Chaffin:

Enclosed please find the revised Draft Proposed Plan for the Building 82 Site, the revised Proposed Approach for the Building 81 Feasibility Study and the revised Summary for the Solvent Release Area Feasibility Study. These documents were prepared as a collaborative effort with the United States Environmental Protection Agency (EPA), Massachusetts Department of Environmental Protection (MADEP), the Local Redevelopment Authority, South Shore Tri-Town Development Corporation, and the Master Developer, LNR South Shore, LLC.

Please note the Navy is committed to following the rigorous protocols for remedy assessment, evaluation, and selection under the Comprehensive Environmental Compensation and Liability Act (CERCLA). Therefore, the documents provided herein remain subject to completion of the Feasibility Study process and public review and comment in accordance with CERCLA.

We are hopeful that the enclosed materials will help us move forward to a positive outcome with respect to the final remedy evaluation and selection process for these three sites.

Sincerely,

A handwritten signature in black ink, appearing to read "David A. Barney", is written over a horizontal line.

David A. Barney
BRAC Environmental Coordinator
By direction of BRAC PMO
