Subject: Final Technical Memorandum for No Further Action (March 2002)
Potential Source of Contamination (PSC) 42
Former Boiler House/Steam Plant and General Storehouse
Naval Air Station Cecil Field, Jacksonville, Florida

Dear Mr. Davidson:

The U.S. Environmental Protection Agency (EPA) has reviewed the subject report and concurs with the disposition of no further action. EPA further concurs with the BRAC classification recommendation to be changed from Grey to Dark Green to denote that releases of hazardous substances have occurred and remedial actions have been taken to protect human health and the environment. EPA's concurrence with the disposition is subject to change pending the receipt of further information which may indicate a change in building conditions.

Should you have any questions, or if I may be of further assistance, please contact me by phone at (404) 562-8575 or by email at taylor.dawn@epa.gov.

Sincerely,

Dawn C. Taylor
Remedial Project Manager
