Dear Mr. Davidson:

I have completed my review of the Draft Site Management Plan for Fiscal Year 2003, Naval Air Station Cecil Field, dated September 2002 (received September 16, 2002), prepared and submitted by Tetra Tech NUS, Inc. I have the following comments which were originally discussed at the September 2002 partnering meeting:

- (1) SWMU numbers for the various sites should be listed in the SWMU column. Several petroleum and BRAC sites did not have SWMU numbers assigned to them.
- (2) As institutional control inspections and reporting are an integral component of corrective action at several sites, the time frames for conducting inspections and reporting the results of the inspection to the regulatory agencies should be included in the Site Management Plan. As inspections and reporting are now occurring at all sites at the same time, these time frames could be placed in the Sitewide section of the report. However, as inspection and reporting requirements for maintaining institutional controls are altered on a site by site basis due to risk-based considerations, these time frames will need to be listed for each site in the Site Management Plan.

This electronic message is being sent in lieu of regular mail. If you have any questions concerning this review, please contact me at (850)921-9991.

Sincerely,
