Subject: Few more comments on the Site 45 Draft ROD

Mark,

1. Page 2-2, paragraph 2.2. OMB does not list sites to the NPL.
2. Section 2.11. First sentence, recommend the following change. "Under CERCLA Section 121 the President must select remedies that are protective of human health and the environment, ..." Change is suggested because both EPA and DON must approve/concur with the ROD.
3. Section 2.11.4. First sentence. Suggest deleting the initial phrase "In the lead agency's judgement,"
4. Page 2-16, Section 2.10.2, Component 1: Land Use Controls, 4th bullet under actions: The Navy may delegate inspection and reporting responsibilities, but I do not believe they can delegate the ultimate responsibility for the remedy. Please make the following change. " The Navy may delegate inspection and reporting responsibilities but will ultimately remain responsible for remedy integrity." Delete "unless that responsibility is later assumed by another entity and with the approval of U.S. EPA and FDEP."
