Dear Mr. Hansel,

I have reviewed the First Quarter Treatability Study Report, BP Wells Site, Naval Air Station Cecil Field, dated April 22, 2003 (received April 23, 2003), prepared and submitted by Tetra Tech NUS, Inc. The document adequately describes the implementation of iSOC™ technology at the site and the results of the first quarter of groundwater monitoring after the iSOC™ system was turned on. The report is adequate for its intent and I concur with the recommendation that the treatability study be continued as specified in the Treatability Study Work Plan.

This electronic message is being sent in lieu of regular mail. If you have any questions concerning this review, please contact me at (850)245-8997.

Sincerely,

David P. Grabka, P.G.
