Dear Mr. Magwood:

I have completed my review of the Letter Report, Supplemental Assessment, Building 46, Naval Air Station Cecil Field, dated May 28, 2003 (received May 29, 2003), prepared and submitted by Tetra Tech NUS, Inc. The report adequately describes the additional assessment required to delineate the groundwater contaminant plume. Based upon the information contained in the report, I concur with the recommendation that a RAP Modification be prepared to address the portion of the plume that falls outside the area of influence of the current remedial system.

This electronic message is being sent in lieu of regular mail. If you have any questions concerning this review, please contact me at (850)245-8997.

Sincerely,

David P. Grabka, P.G.
