OFFICIAL CORRESPONDENCE

Commanding Officer  
attn: Mr. Gabe Magwood, Code ES24  
Southern Division  
Naval Facilities Engineering Command  
Post Office Box 190010  
North Charleston, SC 29419-9010

Dear Mr. Magwood:

I have completed my review of the Third Quarter 2002, Operations and Maintenance Report, Nutrient Injection System, Building 9, Former Tanks 9L1 and 9L2, Naval Air Station Cecil Field, dated July 2003 (received July 11, 2003), prepared and submitted by CH2M Hill Constructors, Inc. The report adequately describes the operations of the remedial systems and groundwater contaminant concentrations trends at this site for the third quarter of 2002. I concur with the consultant's recommendations that the nutrient injection system continue to be operated until two consecutive quarters with no groundwater concentrations above groundwater cleanup target levels are achieved. At that point, continued operation of the remediation system will be evaluated as well as whether to put the site into post-active remediation monitoring.

This electronic message is being sent in lieu of regular mail. If you have any questions concerning this review, please contact me at (850)245-8997.

Sincerely,

David P. Grabka, P.G.
