RE: Final Sampling and Analysis Outline Report, Excavated Soil Pile  
Runways 18R and 18L, Naval Air Station Cecil Field,  
Jacksonville, Florida.

Dear Mr. Davidson:

I have completed the technical review of the Final Sampling and Analysis Outline Report, Excavated Soil Pile - Runways 18R and 18L, Naval Air Station Cecil Field, dated March 2004 (received March 29, 2004), prepared and submitted by Tetra Tech NUS, Inc. The report adequately documents the sampling and analysis of the soil and debris pile created by a contractor working for the Jacksonville Airport Authority as they dug a utility trench between Runways 18R and 18L. The report is approved as final. The Department also concurs with the recommendation of no further action for this site.

If you have any concerns regarding this letter, please contact me at (850) 245-8997.

Sincerely,

David P. Grabka, P.G.  
Remedial Project Manager
