RE: Soil and Free Product Removal at Building 846, Work Plan
Addendum No. 17, Naval Air Station Cecil Field,
Jacksonville, Florida

Dear Mr. Magwood:

I have completed the review of the Soil and Free Product Removal at Building 846, Work Plan Addendum No. 17, Naval Air Station Cecil Field, dated August 2003 (received August 19, 2003), prepared and submitted by CH2M Hill Constructors, Inc. The work plan adequately describes the work to be accomplished in remediating soils and free product associated with Day Tank 1 and somewhat associated with Site 57. Other work described in the report that will be necessary to complete removal of contaminated soils and free product include the demolition and removal of Building 846, the removal of the former Day Tank 1 spill containment basin from service, the abandonment and re-installation of biosparge/soil vapor extraction wells associated with the Day Tank 1 remediation system, and the abandonment and re-installation of monitoring wells. This work has been previously discussed and approved at Cecil Field Partnering Team meetings and in e-mails and teleconferences. This letter is the Department's formal written approval of the work plan for your records.

If I can be of any further assistance with this matter, please contact me at (850) 245-8997.

Sincerely,

David P. Grabka, P.G.
Remedial Project Manager

cc: Mike Halil, CH2M Hill Constructors, Inc.
