RE: Draft Annual Natural Attenuation Groundwater Monitoring
Report Year 3 for Operable Unit 10, Site 21, Naval Air
Station Cecil Field, Florida.

Dear Mr. Davidson:

I have completed my review of the Draft Annual Natural Attenuation Groundwater Monitoring Report Year 3 for Operable Unit 10, Site 21, Naval Air Station Cecil Field, dated October 2004 (received October 13, 2004), prepared and submitted by the SI Group, Inc. I have the following comments that should be addressed in the final report:

- (1) The potentiometric contour map on Figure 3 should be revised to reflect the corrected groundwater elevations and contours as represented in the SI Groups' presentation at the November 2004 NAS Cecil Field Partnering Meeting.
- (2) The data from the re-sampling of monitoring well MW05S should be included in the report.

If you have any concerns regarding this letter, please contact me at (850) 245-8997.

Sincerely,

David P. Grabka, P.G.
Remedial Project Manager
