RE: Draft Annual Natural Attenuation Groundwater Monitoring  
Report - Year 2 for Operable Unit 9, Site 57, Naval Air  
Station Cecil Field, Florida.

Dear Mr. Davidson:

I have completed my review of the Draft Annual Natural  
Attenuation Groundwater Monitoring Report - Year 2 for Operable  
Unit 9, Site 57, Naval Air Station Cecil Field, dated May 2005  
(received May 9, 2005), prepared and submitted by The SI Group. I  
concur with the recommendation to resample monitoring well CEF-  
824A-19S to determine whether a groundwater sample was  
inadvertently switched with a groundwater sample from monitoring  
well CEF-824A-07S. Please include the results of this resampling  
in the final report and any conclusions that can be made based on  
those results. Otherwise, the draft report appears suitable for  
its intent and may be finalized.

If you have any concerns regarding this letter, please  
contact me at (850)245-8997.

Sincerely,  
  
David P. Grabka, P.G.  
Remedial Project Manager
