Dear Mr. Sanford:

This letter is to document my receipt and review of the above reports concerning the operation and maintenance of the remediation system and groundwater monitoring at Building 46, Former Tanks 46R, 46D, 46SUL and 46UL, Naval Air Station Cecil Field, which were prepared and submitted by Terraine, Inc. The reports adequately describe the past remediation efforts and groundwater monitoring at Building 46. I had previously glanced at the above reports to monitor changing site conditions, but the Department's qualified approval of the modifications contained in the Remedial Action Optimization Report (CH2M Hill, May 2007) and the Navy's new contractor have made it appropriate to document in writing the Department's receipt of reports associated with the previous treatment system.

If you have any concerns regarding this letter, please contact me at (850) 245-8997.

Sincerely,

David P. Grabka, P.G.  
Remedial Project Manager
