RE: Groundwater Monitoring Report, 2nd Semi-Annual, 1st Year – January 2009, BP Wells Site, Former Naval Air Station Cecil Field, Jacksonville, Florida.

Dear Mr. Sanford:

I have completed my review of the Groundwater Monitoring Report, 2nd Semi-Annual, 1st Year – January 2009, BP Wells Site, Former Naval Air Station Cecil Field, dated July 10, 2009 (received July 13, 2009), prepared and submitted by Tetra Tech NUS, Inc. The report is suitable for its intended use and approved. I concur with the recommendation to add injection wells BP-7S, BP-8S and BP-9S to the groundwater sampling list for the July 2009 sampling event. Please note that if contaminant concentrations in monitoring well BP-1S continue to increase and contaminant concentrations in downgradient well BP-6S continue to exceed the Department's groundwater cleanup target levels, the Department will require further assessment/delineation of the groundwater plume and possibly active remediation.

If you have any concerns regarding this letter, please contact me at (850) 245-8997.

Sincerely,

David P. Grabka, P.G.
Remedial Project Manager
