RE: First Quarter 2009 Long Term Monitoring Report, Jet Engine Test Cell (JETC),
Naval Air Station Cecil Field, Jacksonville, Florida.

Dear Mr. Sanford:

I have completed my review of the First Quarter 2009 Long Term Monitoring Report, Jet Engine Test Cell (JETC), Naval Air Station Cecil Field, dated July 31, 2009 (received August 6, 2009), prepared and submitted by Solutions - IES, Inc. The report is adequate for its intent. I concur with the recommendation to discontinue groundwater sampling of upgradient monitoring wells CEF-339-28S, CEF-339-29S and CEF-811-16SR and furthest downgradient well NG-24S. I also concur with the recommendation to add downgradient monitoring well CEF-334-01S to the groundwater sampling program. I provisionally concur with the recommendation to discontinue groundwater sampling of downgradient wells CEF-334-32S and CEF-334-33S; provided that the June 2009 and September 2009 sampling results continue to show that contaminant concentrations in monitoring well CEF-334-02SA remain below the Department's groundwater cleanup target levels.

If you have any concerns regarding this letter, please contact me at (850) 245-8997.

Sincerely,

A handwritten signature in blue ink that reads "David P. Grabka".

David P. Grabka, P.G.
