RE: First Quarter 2009 Long-Term Monitoring and Operation and Maintenance Status Report, Building 46, Former Naval Air Station Cecil Field, Jacksonville, Florida.

Dear Mr. Sanford:

I have completed my review of the First Quarter 2009 Long-Term Monitoring and Operation and Maintenance Status Report, Building 46, Former Naval Air Station Cecil Field, dated July 31, 2009 (received August 6, 2009), prepared and submitted by Solutions - IES, Inc. The report is adequate for its intent. I concur with the recommendation to discontinue sampling upgradient monitoring wells CEF-046-09I, CEF-046-12I, CEF-046-13I, CEF-046-14D and CEF-046-15I as these wells have not had a detection of contaminant concentration greater than the Department's groundwater cleanup target level since 2006. For the time being, I do not concur with discontinuing monitoring well CEF-046-25I, which has been a downgradient or sidegradient well, from the monitoring program. However, I will revisit this recommendation as further information is collected.

If you have any concerns regarding this letter, please contact me at (850) 245-8997.

Sincerely,

A handwritten signature in blue ink that reads "David P. Grabka". The signature is fluid and cursive, with a long horizontal line extending to the right.

David P. Grabka, P.G.
