I have completed my review of the Final Sampling and Analysis Report for Building 535, Aviation Ordnance Loading Dock, Former Railroad Bed Site, Naval Air Station Cecil Field, dated May 2002 (received May 14, 2002). The report is suitable for its intent and is approved as final. I concur with the recommendations that No Further Action is required at this site and that the BRAC color code may be changed from Gray to Dark Green to denote that a release, disposal and/or migration of hazardous substances has occurred and that all remedial actions to protect human health and the environment have been taken.
