Subject: OU 10, Site 21, Field Task Modification Request Form for Plume Characterization
NAS Cecil Field, Jacksonville, FL (FL5170022474)

Dear Mr. Sanford:

The U.S. Environmental Protection Agency (EPA) has received and reviewed the subject document dated February 27, 2012. The EPA comments follow:

- Worksheet #5: Recommend adding Stacin Martin;
- Worksheet #11, Section 11.2.2. Typo – change Site 5 to Site 21.
- Worksheet #11, Section 11.2.4: Soil and groundwater samples should be collected.
- Worksheet #11, Section 11.2.5: Project Action Levels (PALS) are FDEP GCTLs. This is only appropriate if they are equal or more conservative than the EPA Regional Screening Levels (RSLs) http://www.epa.gov/reg3hwmd/risk/human/rb-concentration_table/index.htm . Please ensure that the more conservative of the two is being used.
- Worksheet #14, Data Management, page 14: Is there a master Navy database for all sample data. If yes, then that information should be provided.
- Worksheet #15, Reference Limits: Project Action Levels (PALS) are FDEP GCTLs. This is only appropriate if they are equal or more conservative than the EPA Regional Screening Levels (RSLs) http://www.epa.gov/reg3hwmd/risk/human/rb-concentration_table/index.htm . Please ensure that the more conservative of the two is being used.
- Worksheet #16, Project Schedule and Timeline: Will the drilling contractor or TetraTech be collecting the samples? What type of training has the drilling contractor had towards collecting soil and groundwater samples?
- Figure 2: Sampling locations are appropriate for the planned project and accurately reflect BCT discussions.

Please contact me at 404-562-8539 or at vaughn-wright.debbie@epa.gov if you have any questions or concerns.

Sincerely,

Deborah
