RE: Final Site Assessment Report for Site 37 Soil, Naval Air Station Cecil Field, Florida.

Dear Mr. Davidson:

I have completed my review of the Final Site Assessment Report for Site 37 Soil, Naval Air Station Cecil Field, dated July 2005 (received July 14, 2005), prepared and submitted by Tetra Tech NUS, Inc. The report adequately documents that petroleum soil contamination to the south of Hangar 14 has been remediated via soil removal and subsequent treatment by air sparging. I also concur that remediation of the groundwater contamination in the area will continue to be addressed by the Sites 36 and 37 groundwater remediation system.

If you have any concerns regarding this letter, please contact me at (850)245-8997.

Sincerely,

David P. Grabka, P.G.
Remedial Project Manager
