Tank 1 Retention Pond Monitoring
Well Installation SAP

I haven't received an approval for the Site 21 well from you or Steve. Could you look over the proposal and provide approval? Thank you....

Subject: Cecil Field Site 21 & Day Tank 1 Retention Pond Monitoring Well Installation SAP

Attached are the Sampling & Analysis Plans for the well installations at Site 21 and Day

Tank 1. We are planning on installing these wells during the week of January 31st and would like to get approvals for the Document Management System (DMS). Please respond via email and I'll PDF the response and place the PDF in the DMS as an approval.

I located the Site 21 well during the SI Group's presentation of the LTM efforts and the team had approved the well and the location during the discussion during the last BCT meeting.

David requested the installation of the well in response to the Source Removal Report for the Retention Pond at Day Tank 1. Doyle since this is a petroleum site you do not need to review, although your approval or comments are welcomed.
