RE: Final Site Assessment Report Addendum No. 2 for Day Tank 1,
Naval Air Station Cecil Field, Florida.

Dear Mr. Davidson:

I have completed my review of the Final Site Assessment Report Addendum No. 2 for Day Tank 1, Naval Air Station Cecil Field, dated January 2006 (received January 31, 2006), prepared and submitted by Tetra Tech NUS, Inc. The report adequately documents that petroleum soil contamination above residential and leachability soil cleanup target levels associated with Day Tank 1 has been removed. Based on the information contained in the report, No Further Action is required to address petroleum contaminated soils.

If you have any concerns regarding this letter, please contact me at (850)245-8997.

Sincerely,

David P. Grabka, P.G.
