**RE: Request for Approval of Temporary
Well Point Permit For Zone D
Naval Base Charleston, Charleston, South Carolina**

Dear Mr. Bergstrand:

This letter serves as a request to SCDHEC to issue well permits for an additional temporary well point in Zone D at Naval Base Charleston.

Per the SCDHEC comments pertaining to the *Draft Zone D RFI Report*, groundwater samples have been requested in the vicinity of soil sample location GDDSB006. The proposed well point, GDDGP01 is shown on the attached drawing. Two samples are proposed to be collected from this location using direct push technology. The two depth intervals proposed to be sampled are 10 feet bgs and 25 feet bgs which appear to be the optimum depths for sampling in this area to detect the possible presence of groundwater contamination. These depths were selected based on a review of soil lithology as described on well logs for nearby Zone D and E grid wells.

This submittal fulfills the requirements for notification to SCDHEC as stated in the *South Carolina Well Standards and Regulations Document R.61-71*. All temporary wells will be installed by a state-licensed well driller. The subcontractor is scheduled to initiate DPT activities on June 23, 1997.

Mr. Paul Bergstrand
