RE: Request for Approval of Monitoring Well Installation - Zones D, F, and G  
Naval Base Charleston, Charleston, South Carolina

Dear Mr. Bergstrand:

Per your conversation with Ms. Amy Stehlin of E/A&H on August 22, 1996, please find enclosed the proposed monitoring well location map. The shallow monitoring wells will be installed using hollow stem auger methods to an approximate depth of 15 feet below ground surface. The deep monitoring wells will be completed at the top of the Cooper Formation using rotosonic drilling methods. This depth varies across the zones from approximately 25 to 65 feet below ground surface.

This submittal fulfills the requirements for notification to SCDHEC as stated in the *South Carolina Well Standards and Regulations Document R.61-71*. The drilling subcontractor is tentatively scheduled to initiate drilling activities on Monday, August 26, 1996.

If you have any questions, comments, or need additional information, please do not hesitate to call me at (904) 479-4595 or Mr. Peter Bailey (803) 884-0029 or onsite at NAVBASE Charleston (803) 747-0336. We look forward to hearing from you on this matter.

Sincerely,  
*Amy Stehlin for Craig Smith*
