RE: 1. RFI Report Addendum for AOC 609, Zone F
2. RFI Report Addendum for AOC 609, Zone F – Revision I
Charleston Naval Complex (CNC)
SC0 170 022 560

Dear Ms. Daniell:

The Corrective Action Engineering and the Hydrogeology Sections of the South Carolina Department of Health and Environmental Control (Department) have completed the review of the above referenced documents, which were received on July 24, 2001 and November 16, 2001, respectively. This review was based upon applicable State and Federal Regulations, and the CNC Hazardous Waste Permit, effective September 17, 1998. The Department hereby approves the above referenced documents with the following condition:

1. Please be advised that the Department will not grant a No Further Action (NFA) determination under the RCRA Permit until the underground storage tank identified as Site 25 located within the footprint of AOC 609 is granted a NFA under RCRA Subtitle I. However, based upon the currently available data, the Department will not require additional investigation or corrective action under the RCRA Subtitle C corrective action process. Please be advised that additional investigation may be necessary in the future should information become available warranting such action. Furthermore, the permit modification to reflect the status change of AOC 609 will be withheld until Site 25 is fully addressed.

Thank you for your cooperation in this matter. If you have any questions or concerns, please contact Jerry Stamps at (803) 896-4285.

Sincerely,

David Scaturo, P.E., P.G., Manager
Corrective Action Engineering Section
Division of Waste Management
Bureau of Land and Waste Management
