Re: AOC 656 (NS 71)  
Site Identification # 01166  
Correspondence received 23 May 2001  
No Further Action  
Charleston County

Dear Mr. Magwood:

Records submitted to the Department indicate that AOC 656 and NS 71 are the same site. AOC 656 was transferred from the Bureau of Land and Waste Management to the Bureau of Water in a letter dated 4 September 1996. The letter indicated that petroleum contamination found at AOC 656 was most likely associated with the adjacent tank system (NS 71). NS 71 was issued a No Further Action by the Department 12 August 1999.

Based on the information and analytical data submitted, the Department recognizes that the Department of the Navy has adequately addressed the known environmental contamination identified on the property to date in accordance with the approved scope of work. Consequently, no further investigation is required at this time. Please note, this statement pertains only to the portion of the site addressed in the referenced report and does not apply to other areas of the site and/or any other potential regulatory violations. Furthermore, the Department retains the right to request further investigation if deemed necessary.

The monitoring well(s) may be permanently abandoned by a certified well driller licensed in South Carolina in accordance with the South Carolina Well Standards and Regulations, R.61-71 or properly maintained. Should you choose to abandon the well, please submit a well abandonment record to my attention within 30 days of abandonment. Should you choose to properly maintain the monitoring well, please notify me within 14 days of this correspondence. Should you have any questions, please contact me at 803-898-3553 (office phone), 803-898-3795 (fax) or [bishopma@columb32.dhec.state.sc.us](mailto:bishopma@columb32.dhec.state.sc.us).

Sincerely,

Michael Bishop, Hydrogeologist  
Groundwater Quality Section  
Bureau of Water
