RE: AST NS 14 (AOC 659 – Zone H)  
**Site ID # 01311**  
Remediation Monitoring Report received 1 December 2006  
Charleston County

Dear Mr. Patrick:

The Department has completed technical review of the referenced document. Interpretation of the analytical data provided in the referenced report indicates that chemicals of concern remain above established Risk-Based Screening Levels and MCLs. The following comments are provided:

1. Passive free product recovery should continue. However, given the levels of free product preset at this site CNB should consider more aggressive recovery efforts.
2. The Department recommends that a semi-annual free product recovery report be submitted for this site. The next free product recovery report should be submitted no later than **30 March 2007**. Groundwater sampling of those wells not containing free product should be moved to an annual schedule. The next sampling report (combined with the semi-annual free product recovery report) should be submitted no later than **31 October 2007**.

Should you have any questions, please contact me at (803) 898-3553 or [bishopma@dhec.sc.gov](mailto:bishopma@dhec.sc.gov).

Sincerely,

Michael Bishop, Hydrogeologist
