Re: Permit No. 1089
Agent Chemical Company
U. S. Navy Construction Battalion Base
Gulfport, Mississippi

Dear Mr. Harper,

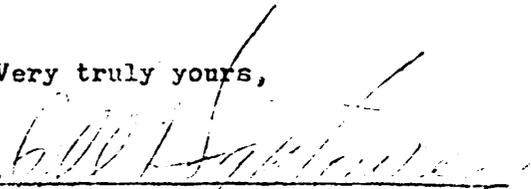

Reference is made to the permit (and especially Additional Condition No. 16 thereof), to our letter of April 30 and our telephone conversation today.

In order to facilitate the filtration or "wet" part of our pilot plant project, we need permission to store, on a temporary basis, some fifteen to twenty of our 2" by 3.3' aluminum cartridges filled with coconut charcoal through which HO has been filtered. We propose to remove these cartridges from the rack and insert them into 3'6" galvanized 4" i.d. pipe threaded on both ends and then securely cap each end. These pipes, in turn, would be placed in a proper metal or concrete storage container for a period not to exceed sixty days. During this time the decision would be made whether to incinerate the cartridges or dispose of them in some other way approved by all government agencies involved.

Please accept this letter as our request for an amendment to our pilot plant Operating Permit.

We believe that with this amendment we will be permitted to complete the pilot plant project expeditiously and then shortly begin the processing effort. Your continued kindness and cooperation is much appreciated. If there is any problem or question about this please call us collect. As time is of the essence, we will greatly appreciate your seeing to it that this matter is on the May 11 Docket.

Very truly yours,

Del Hightower
