REPLY TO  
ATTN OF: DEV

SUBJECT: Dioxin Contamination of Drainage System at NCBC, Gulfport MS (Your Ltr, 2 Jul 85)

TO: HQ USAF/LBEV

Subject letter asked us to evaluate the NCBC drainage system and determine the necessary corrective actions to keep low concentrations of dioxins from entering the storm drainage system. Our recommendations are provided in paragraph 3 of the attached memo. If you concur, we will pursue a contract with ORNL, using DERA funds, as suggested in the memo.

STEPHEN M. VALDER, Lt Colonel, USAF, BSC  
Director of Environmental Planning
