1. In May 1984, we initiated an Initial Assessment Study of Naval  
Construction Battalion Center, Gulfport, Mississippi. We request you review  
enclosure (1) for accuracy and completeness in the findings and  
recommendations. Make your notes of editorial comments in this copy of the  
preliminary report. Provide technical comments separately, using reference to  
specific report paragraphs. To ensure consideration for inclusion in the  
final report, comments must be received by NEESA 112N, by 30 April 1985.

2. Each site recommended for confirmation was ranked based on its potential  
impact on human health or the environment. The rankings will be used in  
determining priorities for confirmation studies. The cost estimates, ranking  
scores, and data used to develop the ranking scores are shown in enclosure  
(2). The cost estimates will be used for planning purposes only. Detailed  
estimates needed for contract negotiation will be prepared by the Naval  
Facilities Engineering Command Engineering Field Division when initiating the  
confirmation study. The Confirmation Study Ranking System used in ranking the  
sites is described in enclosure (3).
