Re: Direct Push Sampling Locations, Letter Report, 13 March 2000.

The Office of Pollution Control has reviewed the above referenced document. Sampling locations appear to be adequate for sampling in the vicinity GPT 07 01. It is noted that a groundwater sample from this well (during the December 1999 investigation) contained a dioxin concentration of 51.6 ppq.

Please feel free to contact me if I can be of further assistance.

Sincerely,

*Bob Merrill*
