Decision Document for Site 4, Naval Construction Battalion Center Gulfport, Mississippi, Draft Final, August 2010.

The Mississippi Office of Pollution Control has reviewed the above referenced document. The following concerns were noted during document review.

1. It would be helpful to have an acronym definition table as the general public is not familiar with typical acronyms used in IRP Program documents.
2. Units of measure should be used when referencing hydraulic characteristics. For example, the text (page 2-15, paragraph 1, first bullet) vertical hydraulic conductivity should be expressed in centimeters per second (cm/sec).

Please feel free to contact me if I can be of further assistance.

Sincerely,

Bob Merrill
