Contract Task Order No. 110

Subject: Final Annual Groundwater Monitoring Report for the Flying Club Site
NAS Key West, Florida

Dear Mr. Caspary:

This correspondence is in reference to your letter dated August 9, 2000 regarding the above-mentioned site. The Navy concurs with your recommendation of adding monitoring well MW-20 as a perimeter well to the upcoming monitoring events for the site in addition to the proposed natural attenuation monitoring at MW-06. In order to minimize paperwork, please consider this letter to be the Navy's submission of the Final Annual Groundwater Monitoring Report for the Flying Club Site.

The Flying Club site is scheduled to be monitored on a quarterly basis. As discussed during the September NAS Key West Partnering Team meeting, the next sampling event will begin in October to coincide with other monitoring events scheduled at NAS Key West.

If you have any questions or comments, please don't hesitate to call me at (803) 649-7963.

Sincerely,

C. M. Bryan
