345 Courtland Street, N.E.
Atlanta, GA 30365

Subj: FINAL DRAFT RFA WORKPLAN,
GROUP 2 SWMUS, NAVAL STATION
MAYPORT, ID FL9 170 024 260

Dear Mr. Johnston:

Naval Station Mayport's (NAVSTA) response to technical review comments, submitted by the Florida Department of Environmental Protection (FDEP) on subject document, is enclosed. Region IV, U.S. Environmental Protection Agency (USEPA) approved subject document without comment. Upon USEPA and FDEP approval of this submittal, NAVSTA will forward errata sheets as requested in USEPA Mr. James Hudson's letter 4WD-FFB of February 11, 1994.

Your letter 4WD-FFB of March 30, 1994, requests submittal of subject document field work report by July 30, 1994. However, the CAMP submittal, to USEPA and FDEP in September 1993, lists October 1994 and November 1994 for the RFA reports for Group 1 and Group 2 SWMUS, respectively. The second revision to the CAMP, submitted in October 1993, and discussed at a February 22-23, 1994 "partnering" meeting attended by USEPA Mr. Hudson/FDEP Mr. Clowes/SOUTHNAVFACENCOM Mr. Driggers/NAVSTA Mayport Ms. Mitchell/ABB Environmental Services, also lists October 1994 and November 1994. During this meeting, the possibility of extending these dates due to minor delays (document reviews, response to comments, and contracting problems) was discussed.

NAVSTA began field work May 9, 1994, and anticipates approximately four months for completion of the work. Analytical results will take an additional three months to receive and validate. The earliest date currently proposed for submittal of the Group 1 and Group 2 RFA reports is December 1994. NAVSTA worked on revisions to the CAMP, as discussed during the partnering meeting, and submitted the revisions for review/approval on May 6, 1994.

If you have any further questions, please contact Cheryl Mitchell, N4E4, at 904-270-6730.

Sincerely,

DOUGLAS P. TOMLINSON
By direction of
the Commanding Officer
