RE: Response to Department Comments, Draft Interim Measures Workplan, May, 1994, and Interim Measure Remediation Work Plan, January, 1995, for SWMUs 6 & 7, Waste Oil Pit and Sludge Drying Beds Area, Naval Station Mayport

Dear Cheryl:

Mr. Bill Neimes has completed his review of the Responses dated February 9, 1995 (received February 13, 1995) to Department Comments for the Draft Interim Measures Workplan dated May, 1994 and Greg Brown has completed his review of the Interim Measures Remediation Work Plan dated January, 1995 (received February 24, 1995) for Solid Waste Management Units 6 and 7, Naval Station Mayport. The Responses and the Work Plan are acceptable, and thus, the Work Plan should be implemented.

These engineering documents collectively comprise the project documentation for construction of the Interim Measures at Solid Waste Management Units 6 and 7, Naval Station Mayport; accordingly, two copies of each engineering certification are included. Please request the Navy to place a copy of these certifications and original, signed and sealed, copies of the subject engineering documents into the administrative record before beginning construction. Additionally, please keep me informed as to the status of implementation of the Work Plan.

"Protect, Conserve and Manage Florida's Environment and Natural Resources"
