CERTIFICATION OF APPROVAL

RE: Identification Number FL9 170 024 260: Interim Measure Remediation Work Plan for Solid Waste Management Units 6 and 7; Mayport, Florida; Prepared by Bechtel Environmental, Inc., Oak Ridge, Tennessee; January 1995, Revision 0.

This site consists of Solid Waste Management Units undergoing investigation and corrective measures under the federal Resource Conservation and Recovery Act Hazardous and Solid Waste Amendments Permit No. FL9 170 024 260. This site is not a petroleum site regulated under Chapter 62-770, F.A.C. The objectives of the interim measure are consistent, however, with Department rules, specifically, Chapter 62-770, F.A.C., to recover free product to the extent practicable.

In my professional judgment, the engineering features described in the engineering document, Interim Measure Remediation Work Plan for Solid Waste Management Units 6 and 7, are consistent with Chapter 62-770, F.A.C. as relevant and appropriate technical criteria to recover free product to the extent practicable. I approve the document for implementation within this scope.

I have not evaluated and do not certify aspects of this plan that are outside the limits of my review responsibilities and outside my area of technical expertise (including but not limited to electrical, mechanical, and structural features). I personally completed this review.

Gregory M. Brown, P.E.
