## CERTIFICATION OF APPROVAL

RE: Identification Number FL9 170 024 260: Interim Remediation Work Plan for Solid Waste Management Unit 2; U.S. Naval Station, Mayport, Florida; Prepared by Bechtel Environmental, Inc., Oak Ridge, Tennessee; June 1995, Revision 1.

This site consists of a Solid Waste Management Unit undergoing investigation and corrective measures under the federal Resource Conservation and Recovery Act Hazardous and Solid Waste Amendments Permit No. FL9 170 024 260. The proposed interim measure is a response to reduce PCB contamination in soil. Other site pollutants and media will be addressed during future corrective measures as necessary.

In my professional judgment, the engineering features described in the engineering document, Interim Remediation Work Plan for Solid Waste Management Unit 2, provide reasonable assurance of reducing applicable pollutants below quantities which may be potentially harmful or injurious to human health or welfare and animal or plant life in accordance with state criteria and authorized by Chapter 376, F.S.

I have not evaluated and do not certify aspects of this plan that are outside the limits of my review responsibilities and outside my area of technical expertise (including but not limited to electrical, mechanical, and structural features). I personally completed this review.
