RE: Interim Measure Performance Specifications Group I Solid Waste Management Units 4, 49 and 50, Naval Station Mayport, Florida

Dear David:

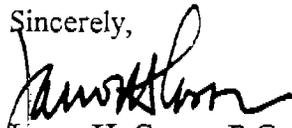

I have reviewed the above document dated June 1997 (received June 17, 1997) and have discussed it on several occasions with personnel from ABB. The document is well written; however, the following minor comments should be addressed in preparing the final document:

1. Please add a notation on Plate 2 which references the sample locations for SWMU 49 to Figure 2-1.
2. Page 5-3, paragraph 4: SWMU 49 is discussed. I believe the reference should be to SWMU 50.
3. Plate 2: are data available for sampling location MPT-2-SD36? If not, this should be noted on the figure.
4. Section 4.3, SWMU 4, page 4-17: paragraph 3, beginning with "sediments," discusses the possible role of organic sediments acting as chelators or binders and "...limiting the migration of analytes and the flushing..." I believe the statement should properly say "...analytes during the flushing..."

Thank you for the opportunity to review this document. If you need further clarification or any additional information, please feel free to contact me at 850-921-4230.

Mr. David Driggers
