RE: Recalculation of Media Background Screening Values; Naval Station Mayport, Mayport, Florida

Dear Ms. Wilson:

I have reviewed the above document dated November 17, 2000 (received April 12, 2001). The document is acceptable for reference to the background values for inorganic constituents in soil and groundwater. Should the Navy desire to utilize the recalculated values for the remaining constituents, the Partnering team should consider it before those values are utilized

If you need further clarification or any additional information, please feel free to contact me at 850-921-4230.

Sincerely,

James H. Cason, P.G.
