RE: Draft Groundwater Sampling Letter Report - Solid Waste Management Unit 13; Naval Station Mayport, Mayport, Florida

Dear Ms. Wilson:

I have reviewed the above document dated October 30, 2002 (received October 31, 2002). Please address the following in the final document:

1. Please be prepared to discuss the sampling and results at the next Partnering meeting in January; specifically, were the iron and manganese values within the range of the data set used in formulating the background values for those analytes at the facility?
2. Should the next phase be preparation of a Corrective Measures Study?
3. Please provide the proper professional certification for the document.

If you need further clarification or any additional information, please feel free to contact me at 850-245-8999.

Sincerely,

James H. Cason, P.G.
Remedial Project Manager
