RE: Soil Sampling Letter Report: Solid Waste Management Unit (SWMU) 16; U.S. Naval Station Mayport, Florida

Dear Ms. Wilson:

I have reviewed the above document dated May 2, 2003 (received May 8, 2003). The document was produced in response to my request for confirmatory sampling at SWMU 16. Recognizing that we had previously completed the RI with NFA designation, Craig Benedikt and I wanted to insure that any ambiguities in the RI be adequately addressed. The results in the present document confirm that no soil PCB contamination is present at SWMU 16 and recommends that a Statement of Basis for the site be prepared. I concur with that recommendation.

Thank you for putting forth the "extra effort" to make sure the administrative record is clear and unambiguous. If you need further clarification please feel free to contact me at 850-245-8999.

Sincerely,

James H. Cason, P.G.  
Remedial Project Manager
