RE: Letter Report: Corrective Measures Study Addendum, Neutralization Basin – SWMU 12,  
Naval Station Mayport, Mayport, Florida

Dear Ms. Wilson:

I have reviewed the above document dated October 24, 2005 (received October 4, 2006 via e-mail attachment). This is to approve the recommendation of No Further Action for this site. This conclusion is based on the change in the Florida SCTL for arsenic that was previously considered a soil contaminant. The change to the new Residential Scenario SCTL to 2.1 mg/kg now renders the site to be not contaminated. The present document is acceptable. As suggested by Craig Benedikt, please prepare the No Action Statement of Basis.

Thank you for the opportunity to review this document. If you require further clarification or other assistance, please contact me at 850-245-8999.

Sincerely,

  
James H. Cason, P.G.  
Remedial Program Manager
