RE: Final Site Assessment Report, Revision 2, Site 289, Naval Station Mayport, Facility ID# 16-8626008, USEPA ID #FL9 170 024 260, Mayport, Florida (Tetra Tech, July 31, 2013)

Dear Mr. Hayworth:

I have reviewed the subject document dated July 31, 2013. The document was received on August 1, 2013. It was completed under Contract Task Order JM60.

The Purpose and Scope section of the report states *"Tetra Tech, Inc. performed a site assessment (SA) at Site 289, Naval Station (NAVSTA) Mayport, Jacksonville, Florida, for the Naval Facilities Engineering Command Southeast (NAVFAC SE)...The data collected during the investigation were used to prepare a Site Assessment Report (SAR). Information from the field investigation has been assimilated into this SAR to provide a characterization of site conditions from which to base future courses of action."*

This section of the Report goes on to state that *"The purpose of the SA was to determine if subsurface soils and groundwater at Site 289 had been impacted by a former heating oil underground storage tank (UST) and an accidental diesel fuel release that migrated on the asphalt surface to a storm drain and ultimately to the adjacent stormwater ditch. This investigation was initiated because sampling results from previous environmental investigations indicated residual impacts to soil at this site."*

Based on my review of the data presented in the document, Tetra Tech has met the stated purpose of this SA and has prepared this SAR in accordance with Chapter 62-780 requirements. Also, the Department is in concurrence with Tetra Tech's recommendation to discuss Remedial Action Plan (RAP) options to address site impacts.

Final Site Assessment Report, Revision 2
Site 289, Naval Station Mayport
