Naval Facilities Engineering Command Southeast
Attn: Mr. Dana Hayworth OPUE3, Remedial Project Manager
135 Ajax Street North, Building 903
Naval Air Station Jacksonville
Jacksonville, Florida 32212-0030

**RE: Final Site Assessment Report and Site Rehabilitation Completion Report, Site 1596,
Naval Station Mayport, Facility ID# 16-8626008, USEPA ID #FL9 170 024 260,
Mayport, Florida (TriEco, July 25, 2013)**

Dear Mr. Hayworth:

I have reviewed the subject document dated July 25, 2013. The document was received on July 30, 2013.

The Purpose and Scope section of the report states "*TriEco, LLC (TriEco), in conjunction with Tetra Tech, Inc., performed a site assessment (SA) at Site 1596, Naval Station (NAVSTA) Mayport, Jacksonville, Florida, for the Naval Facilities Engineering Command Southeast (NAVFAC SE)...The data collected during the investigation were used to prepare a Site Assessment Report (SAR). Information from the field investigation has been assimilated into this SAR to provide a characterization of site conditions from which to base future courses of action.*"

This section of the Report goes on to state that "*The purpose of the recently completed SA was to determine if subsurface soils and groundwater at Site 1596 had been impacted by a break in the oily wastewater pipeline at this location. This investigation was initiated due to a release that occurred on July 19, 2008 during normal operations of the oily wastewater system.*"

Based on my review of the data presented in the document, TriEco has met the stated purpose of this SA and has prepared this SAR in accordance with Chapter 62-780 requirements. Also, the Department is in concurrence with TriEco's conclusion that, based on the data provided, the site meets the Departments Risk Management Options Level I, No Further Action (NFA) requirements from Rule 62-780.680(1). The Department is in the process of preparing a Site Rehabilitation Completion Order (SRCO) for Site 1596. Per the Rule [62-780.680(9)], the SRCO shall constitute final agency action regarding cleanup activities at Site 1596.

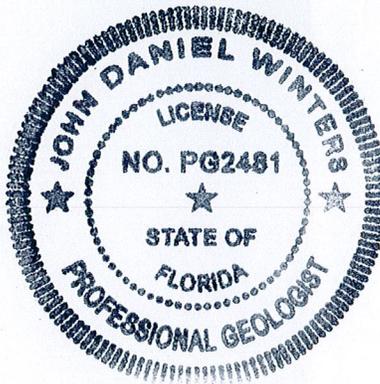

Final Site Assessment Report
Site 1596, Naval Station Mayport
