**SUBJECT: Operable Unit (OU) 4, Groundwater Treatability Studies
Air Sparging Pilot Study
Naval Training Center (NTC), Orlando, Florida
Contract No. N62467-89D-0317/135**

Dear Barbara:

Enclosed please find copies of the Draft NTC, Orlando OU 4 Treatability Study Work Plan No. 2, Data Collection Plan for Assessing Air Sparging. This Work Plan was prepared to present the technical approach for evaluating air sparging as a potential remedial technology for the source area and groundwater at OU 4.

A sparge point and a monitoring point have been installed at the northwest corner of the laundry building. This location will allow an evaluation of air sparging near one of the apparent source areas located outside Building 1100. Additional monitoring points will be installed via TerraProbeSM and hand auger after work plan approval. We will be presenting the details of the proposed pilot study at the March Orlando Partnering Team meeting.

If you have questions or comments regarding this document, please contact me at (781) 245-6606 or John Kaiser at (407) 895-8845.

Very truly yours,
